### Weitere Informationen / Further Information

While I was studying veterinary medicine I was working in horse stable as a horse riding instructor during weekend. We had trouble to have farriers on time and what is more, it happened very often, that the horses were lame after farrier's visit. The owner of stable asked me, if I can do it. So I reached additional education and I started to do it. During and after finishing the study I had several internships with local vets and clinics. During this time I realised I want to be a podiatrist. Firstly I was trimming only, then I started glueing horseshoes and now I also shoe horses. I am always looking for the best solution for horse and owner, I talk about general management and nutrition with owners. I often work in xray.
